ROTARY EVAPORATORS FROM IKA.
**RV 3**

/// The Beginner

The new RV 3 rotary evaporator is the ideal entry-level model, but is also a real all-rounder. It finds a multitude of uses in the chemical, pharmaceutical and biotechnology industries, in research and development, in manufacturing and quality assurance, in laboratories, and in plant construction.

RV 8
/// The Athlete

The RV 8 features a user-friendly manual lift with an integrated safety lift-out function in case of power failure. The RV 8 is the ideal choice for all standard distillation applications. Digital displays for speed and heating bath temperature enable optimum control of the entire distillation process. The device is distinguished by its user-friendly handling concept and distills the desired solvent safely and with absolute precision.

RV 10 auto pro
/// The Pioneer

The RV 10 auto pro rotary evaporator is now fitted with our full-automatic VACSTAR digital vacuum pump. This enables better automatic detection of the solvent boiling point. This function offers several decisive advantages in comparison with a valve-controlled system, a pumping unit, and a simple rotary evaporator.

EXTREMELY SPACE-SAVING, AS THE PUMP CAN ALSO BE PLACED BEHIND THE ROTARY EVAPORATOR
